The world of international trade today includes many Free Trade Agreements (FTAs) and Trade Preference Programs importing and exporting companies can consider utilizing as sourcing and sales strategies. They are complicated and can create liabilities for those firms who do not fully understand their obligations and responsibilities.

This seminar will include an overview of the documentation requirements of various FTAs and Preference Programs and the responsibilities and liabilities of firms utilizing these programs. This seminar will *not* discuss the qualification of product, but rather what documents are needed to make the preferential duty claim assuming the product being imported or exported does qualify for the program being claimed.

- *A review of the documentary requirements of each FTA and Preference Program;*
- *Red flags indicating insufficient declarations and certificates of origin; and*
- *Customs procedures and enforcement.*
